PROFESSIONAL SUMMARY

Senior Backend Engineer with 6 years building high-throughput financial systems. Led the architecture of a payments microservices platform processing █500Cr+/day. Deep expertise in Python, PostgreSQL, Redis, and AWS. Strong advocate for clean architecture, observability, and test-driven development.

SKILLS

Languages: Python (6yr), Go (2yr), SQL

Frameworks: FastAPI, Django REST Framework, Celery

Databases: PostgreSQL (query optimisation, partitioning), Redis, MongoDB

Cloud: AWS (EC2, RDS, SQS, Lambda, CloudWatch), Docker, Kubernetes (EKS)

Messaging: Apache Kafka, RabbitMQ

Observability: Prometheus, Grafana, ELK Stack

Tools: Git, GitHub Actions, Jenkins, Terraform, gRPC

EXPERIENCE

Senior Backend Engineer — RazorPay (Payments Team) | Jan 2021 – Present (3.5 yr)

- Architected a microservices-based payment processing system handling 15M+ transactions/day with 99.99% uptime
- Reduced PostgreSQL query latency by 68% through indexing strategy and connection pooling (PgBouncer)
- Built Kafka-based event streaming pipeline for real-time reconciliation across 20+ banking partners
- Implemented PCI-DSS compliant encryption layer and rate limiting for all payment APIs
- Mentored 4 junior engineers; established backend coding standards and PR review culture
- Achieved 94% unit test coverage across core payment modules

Backend Engineer — Juspay Technologies | Jul 2018 – Dec 2020 (2.5 yr)

- Developed REST APIs for payment gateway integrations using Python/Django, serving 5M+ users
- Designed Redis caching layer reducing API response times by 40%
- Containerised 12 microservices using Docker; deployed on AWS ECS

EDUCATION

B.Tech in Computer Science | IIT Bombay | 2018 | CGPA: 8.7/10

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (2022)

AWS Certified Developer – Associate (2021)

PROJECTS

PayFast Gateway (Open Source): Built a pluggable Python payment gateway library supporting 8 Indian payment methods; 1.2k GitHub stars.

PG Replication Monitor: Prometheus exporter for PostgreSQL replication lag monitoring, used in production at 3 companies.
