## SUMMARY

Backend Engineer with 5 years of experience in Python microservices and cloud infrastructure. Proficient in building REST APIs and working with AWS. Looking to transition from e-commerce to FinTech. Strong fundamentals in distributed systems and database design.

## TECHNICAL SKILLS

Python, FastAPI, PostgreSQL, MySQL, Redis, Docker, Kubernetes, AWS (EC2, S3, SQS, RDS), Git, GitHub Actions, Celery, REST APIs

## EXPERIENCE

**Backend Engineer II** — Flipkart | Jun 2019 – Present (5 yr)

- Built order management microservices in Python/FastAPI handling 2M+ daily orders
- Optimised PostgreSQL queries and indexes, reducing p99 latency by 35%
- Designed Redis caching for product catalogue (12M SKUs), improving read throughput 5x
- Deployed containerised services on Kubernetes; managed CI/CD with GitHub Actions
- Wrote unit and integration tests; maintained 88% code coverage

## EDUCATION

B.E. in Information Technology | BITS Pilani | 2019

## CERTIFICATIONS

AWS Certified Developer – Associate (2023)

## PROJECTS

**Inventory Sync Service:** Async inventory reconciliation service using Celery + Redis.

**API Rate Limiter Library:** Pluggable rate limiting middleware for FastAPI.
